#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 05 February 2004.  
 2a) This action is FINAL.                    2b) This action is non-final.

## DETAILED ACTION

1. Claims 1-18 are pending.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, drawn to a system for recovery of a database from dump files, classified in class 707, subclass 205.
  - II. Claim 5-13, drawn to a system for reducing recovery time in a server-database network, classified in class 707, subclass 200.
  - III. Claims 14 and 15 are, drawn to a database recovery by building a recovery backup disk with correct data, classified in class 707, subclass 202.
  - IV. Claims 16-18 are, drawn to a database recovery using the most current files, classified in class 707, subclass 203.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions Groups I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination Group 1 has separate utility such as establishing various sets of dump files in the first storage. Group II has a separate utility such as a data storage holding database files for read-write

access by a server. Group III has a separate utility such as developing a file of accumulated backup dump files of incremental backups. Group IV has a separate utility such as initiating a DM Dump Directory Library means in order to read the Main Directory files. See MPEP § 806.05(d).

4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

6. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
